Performance Hose & -AN Fitting kit

By CPR RACING

***THE MOTORCITY POWER BOX -
PRE-ASSEMBLED FUEL KIT TO
TAKE THE GUESSWORK OUT OF
BUILDING YOUR FUEL SYSTEM.***

*Power Box Stage 1- Shown with optional Fuel Filter

LS, LSX – EFI Conversion – Power Box

- PRO-B2000 Fuel hose kit – Nylon Braided
- PRO-B3000 Fuel hose Kit – Stainless PTFE
- PRO-B4000 Fuel Hose kit – Black PTFE

CPR Racing offers a kit called the Power Box that is designed to help with plumbing a fuel system in a car. This kit includes various components and fittings necessary for setting up a fuel delivery system. It is specifically designed to provide a convenient and comprehensive solution for fuel system plumbing.

The Power Box kit typically includes fittings, hoses, and other necessary components. It may also include a high-quality AN (Army-Navy) hose, which is a type of flexible hose commonly used in high-performance automotive applications. The AN hose is known for its durability, resistance to abrasion, and compatibility with various fuels.

By using the Power Box kit from CPR Racing, you can simplify the process of plumbing a fuel system in your car. The kit ensures that you have all the required components and fittings, eliminating the need for guesswork or searching for individual parts. This convenience can save you time and effort during the installation process.

It's important to note that while CPR Racing may offer a product called the Power Box, it's always a good idea to review the specific details and instructions provided by the manufacturer to ensure proper installation and compatibility with your vehicle's fuel system
